

St. George's College

Headmaster's Report

1945

ST. GEORGE'S COLLEGE

HEADMASTER'S REPORT

1945

Since 1939 the thought of war has dominated all our activities and interests. We have seen boys leave the School for service overseas, we have heard of their deeds and sufferings, even of the deaths of some of them; we have been preparing boys for life with the thought always at the back of our minds that these pupils of ours must soon face death in many violent forms. Now our enemies are vanquished and the slaughter has ended. Even with the threat of many unsolved problems over us, it is only right that at the beginning of this annual report I should pay my tribute to our dead, and record in brief the services rendered by old boys in many parts of the world, as well as the honours they have gained.

I have been able to trace the records of 337 Old Georgians who have served in the forces either of Great Britain or the United States. This number includes both those who were educated entirely at St. George's, as well as those who went from us to English schools and who were, therefore, in England at the outbreak of war. Of this number 47 have lost their lives and 7 were for varying periods prisoners of war.

Turning to the honours list I have so far been able to trace the following:

British

D.S.O. and 2 Bars	1
D.S.O.	4
D.S.C.	1
D.F.C. and Bar	2
D.F.C.	16
M.C.	2
M.B.E.	1
Mentioned in Despatches	5
D.F.M.	2

United States

Purple Heart	1
D.F.C.	1

French Decorations

Croix de Guerre	2
Free French Resistance Ribbon ...	1

I have arranged that the lists summarised above will be published with this report, and I hope that those of you who have friends and relations who are old boys of the School will see that our record lacks nothing for its completion. We shall thus leave on record a permanent and accurate memorial of all the work of our old boys during the war.

We now have to train the youth of the world for peace, but if I read the signs aright our training will not have to be so very different. The threat to our civilization, met and defeated at so great a cost, is still there: indeed the war has made us realise that civilization is never safe unless we are living, working, and if necessary, dying to preserve it.

The year now drawing to a close has seen us faced with difficulties not of our making. In a country like this, where education is inextricably mixed with politics, the student's life is bound to suffer in times of political unrest. We of Anglo-Saxon descent, upholders of a very different tradition which does not allow the student to engage in politics, have not been directly affected by the disturbances in all parts of the country. But two factors have caused some unsettlement: the end of the war has brought a change in outlook to our older boys and has made them have to face unexpectedly the question

"what shall I do with my life?" It seemed so likely that many more last year students would have to march away to war, and suddenly without warning, there was no war to march to. This has led to a rather natural unrest and uncertainty in the minds of some. Then the Government decree allowing all National College boys with a minimum of five marks to pass into the next year without examination, has further unsettled the *boys in the National College classes, who, rather naturally felt that if they had finished their year's work with such low marks they could put their feet up.* I am glad to say that they gladly accepted a rather more uplifting view of life, and all forms have worked according to our plan until today. We see no reason to upset the education of youth because the war has ended or because of political uncertainty.

The past year has seen our occupation of the new Junior School buildings which were filled from the opening of the March term. Some parents have expressed surprise that there is no dining-hall for the boys who live there. Let me point out again that this new Junior School is the first stage in the general rebuilding of our residential quarters, and that in this general plan, the new dining hall and kitchen will stand within a hundred metres of the new Junior School front-door. For the meantime the Junior School boys, occupying better quarters than any other section of the school, have to put up with a lengthy walk to their meals: the exercise will do them good and the occasional walks in rain or storm will harden them.

The Junior School is at present being used to house boys both in the Argentine grades, and some 30 boys who are in the first year English form and the first year National College. As the school develops it is likely that the Junior School will serve entirely for boys who have not passed their primary education tests, but for the moment as the College is not big enough to house all those engaged in secondary education, it serves as a valuable overflow for the young boys of the College. In games the Junior School is organised as a separate unit, though the older and larger boys play with the College if this is desirable. For sports, other than

Rugby and Cricket, we run events on an open basis, first to those under 15 and secondly to those under 13, irrespective of whether they live at the Junior School or the College. In spite of this close connection with the College it is our hope that the Junior School will develop its own "personality", just as the Preparatory School has done; for if there is one tradition of the English education which is both stimulating and valuable, it is this diversity of outlook and interests we find even in the different houses of the same school.

Our other new building, the Science Laboratory, is not yet in use. Shortage of materials and labour have slowed down work, but by March next year we hope that the building will be ready for use.

The end of the war brings in sight the possibility of our obtaining new masters to fill our vacancies. We have been particularly fortunate in being able to keep an adequate qualified staff throughout the war, and we can take particular pride in the fact that in the mathematics and science of the school, sections so important to those entering the Army, Royal Navy, or Royal Air Force, the standard of our work has risen to very high standard. Last week I had reason to look up the record of a boy who passed the School Certificate in 1939, and I was surprised by the few entries, nine in total, and the low standard of the passing marks. For the last four years we have entered over twenty candidates for the School Certificate each year; we have in addition, entered candidates for the Higher Certificate; and our greatest successes have been from those boys who have shown aptitude for mathematics and science. We owe a great deal of this to Mr. R. Minor who in 1947 returns to the Preparatory School as its new headmaster; also to Mr. J. Taylor, the Science master, who took over the Department in 1940, and to Mrs. Johnston who has worked untiringly with the Higher Mathematics in the upper school for the last three years. I am sorry that Mrs. Johnston can no longer continue with us. She has the satisfaction of knowing that her services have meant a great deal to the school, and have also meant

much to some of her students who are now holding commissions in His Majesty's Forces.

Our present and future needs have caused the Board to order me to England at the end of this year so that no time may be lost in filling up the gaps in our teaching staff, and make contact with employment bureaus, universities and scholastic organizations in England which will help our future development. My first task will be to find a successor to Mr. Minor as senior mathematics master, and assistant science masters to help in the science class-work. This visit to England is made possible by the fact that we have an adequate staff. I expect to be a few weeks late next term: but in my absence Mr. W. Proudlock will exercise general control over the College with Mr. Minor supervising and directing the class-work, and the Rev. E. A. C. Rattray and the Rev. G. M. Oakeshott taking charge of the School Chapel and its Services.

Mr. J. K. Abraham, who was a member of the staff from 1941 to 1943, returns next year and will take charge of much of the National College English and general subjects at the College and Junior School.

During my visit to England I hope to have time, not only to review the possibility of finding masters, but also to visit the universities and establish contact with colleges at Oxford and Cambridge, so that we can send boys direct from St. George's to the universities for their further education. In this respect I cannot stress too strongly the need for parents to make up their minds early if they wish their sons to go to universities in England. The problem is not only one of preparation; from correspondence we know that the universities at home are filled to overflowing and this congestion will continue for at least another three years. Men coming out of the forces will, many of them, decide to continue their education or to gain a degree before they seek employment, and therefore there will not be as much room as usual for boys proceeding straight from school. It is essential that all boys proceeding from here to Oxford or Cambridge should have their names down on the books of some college at least two years before they propose to

go into residence, and that they should be prepared to take the Higher School Certificate Examination the year before they wish to enter.

This same forethought is today necessary for those parents who plan to send their sons to English public schools. These schools are very full and are still demanding that their pupils should have a working knowledge of Latin and French when they enter. We must therefore know when a boy enters the Preparatory School if he is destined for an English public school, only so can he possibly hope to enter and take his rightful place. With this in mind I have been in touch with the headmasters of the following schools: Marlborough; Haileybury; Cudle; Gresham's, Holt; Sedbergh; Bedford Modern; Bedford Grammar School; St. Edward's, Oxford. I shall be pleased to give parents any information they need about these schools, including the conditions of entry. I must say, in passing, that in my opinion those parents who wish their children to receive part of their education in Great Britain would be well advised to consider whether they would not get more out of leaving their sons at St. George's until their secondary school stage is past, and then spending their money on a university education at home. In my opinion there is nothing to compare with the university education gained in Great Britain, for at his university a young man mixes with all sorts of men and broadens his mind at the same time as he pursues his chosen vocation. The boy who goes to an English school makes his friends there, and then comes back to the Argentine at nineteen to find that he has not been adequately prepared either to earn his living in this country, or to mix with the people of this land. I do not lay that down as a hard and fast rule, but I do ask parents to consider all possibilities before sending their children away.

It is our aim here to provide an all-round education for English speaking boys which will enable them to hold their own either here or in the Empire. All our plans for the future are being made with this idea in mind. The plans are now under consideration for the closer coordination of all sec-

tions of the school; we are constantly revising school syllabus to see if we can assure that all our pupils will master both English and Spanish; we are putting the physical and moral health of the children as being the most important part of their upbringing, and as we are not afraid to try new methods and to move with the times, I feel sure that the school has a long and prosperous future. Our relations with the Argentine Government authorities are the most cordial, and we are determined to enter into the student life of the country by joining, whenever possible, in inter-school contests and by inviting representatives of Argentine schools to visit us. We do well to realise that the student life of the Argentine is very much awake, and that many of the school leaders are learning rapidly and are hungry for educational reform. They admire much they see in our Public School system, and the winning of the war by the sport-loving races has not been lost upon them. As peace becomes established it may be possible for us to arrange exchanges of masters between St. George's and schools in Great Britain, and thus we shall be both keeping in touch with the sources of our traditions and also become the instrument through which these traditions can overflow into the educational system of this country.

We can only progress and grow if our numbers remain fairly stable. In our general reorganization plan we fixed 400 as our ideal number. I am glad to say that we opened the year with 396 boys and that in spite of some departures to English schools brought about by the end of the war, these numbers have been maintained. At the time of writing this report the numbers for next year are about the same, and unless there are some unforeseen withdrawals the school will be full before I leave for England. There is a tremendous demand for secondary school education and for this reason the numbers in the College section have risen beyond our planned 200. As far as the teaching room goes this extra number is made possible by the erection of the science laboratories which have freed rooms for new class-rooms, and the increased size of the Junior School Dormitories has enabled us to carry our full numbers. The exact numbers

living in each section of the school were as follows:

	Easter Term	Christmas Term
College	182	183
Junior School	114	110
Preparatory School . . .	100	103
	396	396

PUBLIC EXAMINATIONS

I do not propose to give any full report of the National College examinations. As mentioned above, an average mark of 5 in the year's work secured exemption from Examination: a very low standard. I can only hope that we shall not suffer next year as a result of this unexpected leniency. Some 11 boys received their "Bachillerato" and will most probably pass on to the Argentine universities. It is interesting to note in passing that of the 13 "Bachilleres" of 1944, six joined the British Forces within six months of passing out of St. George's. I hope the implications of this are not lost upon those carping critics who said that "to go National College" was to lose one's love for England and the English way of life.

Cambridge School Certificate.

The results of the Cambridge Examinations were good. Of the six candidates entered for the Higher Certificate, four passed. Of the 23 candidates entered for the School Certificate, 19 boys passed, and of these 7 were 1st Grade, 7 were 2nd Grade and 5 were 3rd Grade. In addition to the full examination, 6 boys gained supplementary certificates.

In the Junior School the classes have continued their studies of the 5th and 6th Grades of the National Primary Course, and have received lessons also in English subjects.

In the coming year provision will be made for those boys who definitely are going to English schools, for in the light of our information such boys will have to receive far more lessons in Latin and French. Parents must face the fact that the Spanish of such boys is bound to suffer.

Before passing on to other school activities of the year, I digress to draw certain conclusions. Looking at a photograph in the "Georgian" of the year 1934, I find the Headmaster of the College surrounded by a staff of seven English masters, two Spanish masters and one French master. Of the English masters, one was the Art master, another was the Music master and the third was a Games master. The whole of the teaching work of the College was done by six men. The Spanish work was covered by two Argentine masters. A photograph taken today would show the Headmaster surrounded by 14 resident masters and 18 visiting teachers. While it is true that the visiting teachers are not here all the time, it is yet fair to draw the conclusion that our work has grown not only in amount but in variety. Looking back to 1934 when I was one of the English masters, I can remember our large forms and how we were often compelled to combine them, and that the supervision duty fell upon five of us. We still managed to run a Scout troop and Debating Society as well as organizing plays and School concerts.

The work of the School is now organized on a very different basis: there is more delegation of authority to Senior Masters; there is far more specialization. Further, the boys understand Spanish and English equally well; the Public examination results both in English and Spanish are much better; and the conditions of life for both boys and masters are very different from the days of 1935. The results we show this year are evidence of the definite progress we are making: a progress which has come about after much trial and perhaps some errors. Returning to my photograph of 1934 I find with Canon Stevenson the familiar faces of Mr. Proudlock, Mr. Cordon, Mr. Ricagno and Mr. Iglesias: men who are still with us and who have carried the School through these ten years. Mr. W. Proudlock has been Senior Master since 1934, and to him falls much of the unspectacular work so necessary for the smooth running of the school and the maintenance of discipline. It is easy to take this work for granted because it is well done. None the less, we should remember that no progress can be made un-

less the school is running smoothly, and I take this opportunity to express my own personal gratitude to Mr. Proudlock for his effective work and interest during these years.

Mr. Cordon joined the staff in 1934 and was appointed as Head of the Junior School in 1936. After nine years of work in uncomfortable and inadequate buildings he has entered the beautiful surroundings of the new School. In the meantime the Junior School numbers have jumped from 40 to 110. Mr. Cordon's work has always been most valuable to us and upon him and his staff has fallen the task of preparing boys for the change from the Preparatory School to College life. Since 1938 he has been assisted by Mr. R. A. Kelly and Mr. R. Charo. Mr. Kelly has had considerable success with his Latin pupils, and has done much valuable work with the games. Mr. Charo has a combined knowledge of English and Spanish, and as well as his general supervision duties he has been most successful in teaching the School Certificate classes translation from Spanish to English and vice-versa.

The other figure in the old photograph is Mr. W. Hodgson, Music master to all three schools, who joined the staff in 1932. He does not seem a jot older than when he came, and as no one knows how old he was then, he can still claim that he is two years younger than Mr. Proudlock. The quality of the singing in the School Chapel and the reputation of the annual performances of the Gilbert and Sullivan operas, as well as the affection and esteem he inspires in his private pupils and choir boys, all indicate the value of his work.

I have already mentioned Mr. R. Minor's services as Senior Mathematics master. It is interesting to recall that Mr. Minor was Canon Stevenson's last appointment and came to St. George's Preparatory School at the beginning of 1935. He succeeded Mr. T. Howat as Senior Mathematics Master at the College in 1938. In addition to his teaching duties he was a most enthusiastic Scouter, being responsible for the Wolf-Cub pack at the Preparatory School, then assistant Scout master and finally Scout master, when I became Headmaster. He has been my right hand man in organizing camps,

and the Bariloche Camp expedition which has proved so popular was begun at his suggestion. He will be a very difficult man to replace at the College, but will prove a very appropriate successor to Mr. Rattray at the Preparatory School, having already spent three years there.

Mr. J. H. Harbord joined the staff in 1936 and has been Senior English master since then; the steady improvement in the English of the Upper School is entirely due to him and he has always shown a great interest in the boys' sports and games. Mr. Thorburn followed Mr. Harbord in 1939 and he came to take over the Art of the School: the Arts and Crafts department with its Carpenters' Shop and fine new Art Room is literally his creation. Like Mr. Hodgson in his department, Mr. Thorburn is responsible for Art right through the three schools. Mr. G. W. Halkett joined the Staff in 1940 and has done useful work, first with junior and then with senior boys. His knowledge of the stage has been useful and he has produced some excellent plays.

Mr. J. R. Larcombe joined us in 1944 and is responsible for the games in the Senior School and teaches History and Economics, and this year the Rev. G. M. Oakeshott joined the School as Assistant Chaplain, teaching also Mathematics in the Middle School, and Mr. D. Cavanagh took charge of the games of the Junior School.

Mr. C. M. Gallardo has been in charge of the National College Physical Training since 1941, and Mr. C. I. Englander of the corresponding classes on the English Side; Mr. O. Tavella acts as Musketry Instructor and joined the School in 1943.

Among a number of visiting teachers who come a few hours a day I find that Mlle. M. A. Dachy who succeeded Monsieur Vas- soigne as a teacher of French in 1937, has been the regular teacher of that subject ever since. Sr. Pappolla who first came to help with the Grades in 1943 is now Secretary of the National College section, and has rapidly made himself indispensable and a most ready understudy for Sr. Iglesias.

HEALTH

In the planning of the new Junior School particular care was given to the size of rooms, the provision of adequate space between beds and first-class ventilation of both dormitories and class-rooms. Notwithstanding all our care, the Junior School suffered an epidemic of scarlatina which fortunately did not grow to serious proportions. We also suffered in both sections of the school from "gripe" which this year was of a particularly unpleasant kind. Boys took longer than usual to recover and seemed to be under the weather for a long time after the disease had left them. These outbreaks and the occupation of the Sanatorium throughout the July holiday, have put a heavy strain upon our nursing staff, but Sister Ford carried the extra work cheerfully and successfully. Sister Ford has now been in charge of the Sanatorium for 12½ years; her responsibility has increased as the numbers in the school have risen. Latterly she has had to face the added difficulty of the impossibility of securing additional nurses at short notice. Under her direction the sanatorium is very well run and our sick boys could not be in more capable hands.

The Medical officer Dr. Mongiardini has had his hands full, but come what may, he is as imperturbable as ever. He has this year completed 10 years service as our Medical officer. He is assisted from time to time by different specialists and I am grateful to him and to the following members of the Medical Profession who have helped us from time to time:

For General Consultations: Dr. F. Pozzo.

For Dental work: Dr. J. E. MacHannaford.

For Orthodontic Treatment: Dr. M. V. González.

For Nose, Throat and Ear Cases: Dr. F. Games.

For Analysis and Blood Tests: Dr. A. Iacobucci.

For Eye Examination and Treatment: Dr. H. Moulie.

For Operations and General Consultations: Dr. J. Mulcahy.

The health of a large school depends not only on those who tend the sick; but on those who look after the healthy. Any housewife knows that this has been a difficult year for catering, and feeding 400 people presents problems never dreamed of by the housewife. In spite of strikes at the Freezing Plants, and shortages in many commodities, Mr. Freyberg has managed to feed us well and he is to be congratulated on a very fine achievement. The Matrons too have felt the effect of the numbers falling ill, and Sister Ayliffe at the Junior School had a hard time during the "gripe" epidemic looking after the sick as well as keeping on with her work of maintenance.

At the College Mrs. Peters has had her difficulties and the ever increasing shortage of domestic servants makes the task of any matron unenviable.

The headaches of the Matron's and Carter's department are shared by the Bursar and his assistants. The College property has grown. Playing field area has doubled in the last few years, and labourers and domestic servants work less hours than in 1935. Add to these, natural signs of progress in the School and in Social welfare generally, the paper work a government department thinks necessary to control 100 employees, and we have a fair idea of the Bursar's problems. Mr. Fergusson who has been Bursar since 1935 has seen the work grow enormously since he came. He has managed our internal finances with skill and thrift.

In this he has been ably assisted by Mr. A. Billett, who has to attend to those tiresome financial details which we should all like to forget.

My sudden departure left much responsible work upon the young shoulders of my secretary Miss Balfour. Had I not had complete confidence in her ability to deal with the manifold matters which are ever present I could not have made my decision to leave before the end of Term.

SPORTS

1944 stood out as a red-letter year, and somewhat naturally in comparison 1945 has paled beside it. But notwithstanding

that, the College Rugby XV acquitted itself well and won the annual match against a combined Fourth Division team. In "Inter-colegial" Rugby the team drawn from the National College forms was not so successful and was caught by our old rivals from the Colegio Nacional Pueyrredón on an off day. To our surprise Pueyrredón was beaten in the final by the Colegio Nacional Manuel Belgrano. Our "Inter-colegial" side was young and inexperienced and should acquit itself well next year. Some of them showed real ability by winning the Seven-a-Side Tournament in no uncertain fashion.

The Boxing competitions were as keenly contested as ever, and I should like to record a very valuable addition to our trophies — the James Watt Boxing Trophy — presented in memory of Jimmy Watt by his mother. It will be given to the best boxer of the year. My readers may remember that Jimmy Watt was the first captain of the Junior School, and that in this war he was a Flight Lieutenant in the Path-Finder Squadron, and gained the D.S.O. and the D.F.C. He was brought down in a bombing raid over Holland and perished with all his crew. Another donation, equally generous, was given by an old friend of Comon Stevenson and the School, for the building of the new tennis courts below the "Barranca".

Cricket, Athletics and Swimming have all followed their usual course; tennis has been somewhat interrupted by the laying of the new tennis courts, two of which are now completed and the third of which will be ready at the end of the year. In spite of a shortage of ammunition for the miniature range, the shooting has taken place there all the year, and with the co-operation of the Dirección General de Tiro y Gimnasia and the Lomas Rifle Range, we carried on our normal plan of shooting on the open range; the Dawney Cup and Haileybury House Cup competitions being shot for on the day that many residents of the southern suburbs had to walk home owing to the general strike.

The usual Physical training programme has been carried out; a pleasing feature this year being the return of our Gym VIII to some of its former glory. Mr. Englander

is to be congratulated on the smartness of the Eight and their proficiency in some very difficult exercises.

As soon as the Rugby season was over work was begun on the fields, and the earth, which had come from the Junior School foundations, was laid over the lower part of the first-game field. Cricketers may remember the strain of bowling uphill from the tennis court end. They will be pleased to hear that all the land between the old tennis courts and the first-game pitch has been raised and levelled. This levelling which will improve both the Cricket ground and the running track, has vastly improved the appearance of the first-game field.

The heavy building programme carried out in the last two years cause major alterations in the lay-out of the games fields and Tennis courts. This has brought much extra work to the ground staff who have been called upon to keep the School games going and at the same time undertake much new work. That they have been able to do so is due in the first place to the devotion of Carlos Bedini the Foreman who has spared no effort to meet all our requirements. We have also been fortunate in that Francisco Sala who was groundsman under Mr. Creese has returned to take charge of the Fields.

HANDICRAFTS AND STAGE

Sixty-seven boys have taken voluntary carpentry work throughout the year, and judging from the awards won in the Arts and Crafts Exhibition organized by the local committee of St. Dunstan's Society, the standard remains high. I do not think there is an outstanding carpenter in the school this year, but there is plenty of keenness and this section continues to fill a much needed want. We should add to it as soon as possible by the provision of metal-working machines, and plan for the day when carpentry can become a regular subject for certain forms of the school.

Two plays were staged during the year. The "Pirates of Penzance" played to a large audience in Quilmes and then went to town for the benefit of parents and friends. As a result of these performances some \$2,000.— m/n. were handed to charity. In the second

term of the year Mr. Halkett produced "Arsenic and Old Lace".

It seems worth recording that in the public essay competition organised by the St. Andrew's Society of the River Plate, St. George's College pupils gained eight out of thirteen prizes. This is proof enough that in spite of the time given to the Spanish subjects in the Junior forms we have been able to maintain a good standard in English composition. The candidates are to be congratulated on their efforts. They enter this competition without any special preparation at all on our part, and I am very pleased to encourage them to enter provided they can stand on their own feet.

OLD GEORGIAN CLUB

I should like to express my appreciation to the retiring president of the Old Georgian Club, Mr. Ronald Martin, for all his interest and help during his term of office. The regular help given by the Club to the School each year is very real and greatly appreciated. The care lavished on the Old Georgian General Knowledge Examination is a fair example of the thoroughness of the Club's welfare work for the School. We are indebted to the Committee for providing us with prizes and books for the Libraries, as well as many tokens of their interest in the shape of practical services such as refereeing matches and officiating at our Annual Sports.

In Mr. Nichum the Club has found a worthy successor to Mr. Martin, and I feel sure that the relationship between the School and its Old Boys is secure in his hands. Under his leadership the drive for the Canon Stevenson Memorial is to be renewed during next year, and I hope that with the aid of all Georgians past and present, and our many friends or should I say relations — the mothers and fathers of many generations of boys — we shall be able to enlarge the Chapel so that we shall no longer have to dress in the garden nor overflow into the road outside the west door. It would seem to me, that looking back on our history it is only fitting that our first task after a devastating war should be to

make sure that all our members can worship together; for if there is one force that has built St. George's, it is the undying faith of its founder that no task should be undertaken without God's guidance or his blessing, and that work without worship is vain. It has always been our practice to assemble the school for prayers morning and evening, and it is our policy that "the reverence of the Lord is the beginning of wisdom". Prudence might suggest that we should build new class-rooms; aesthetic taste might suggest that our gates are not beautiful; but our Christian instinct should suggest

that a simple building for the worship of God comes before either; because the worship of God is the main-spring of life, and from it will flow the aesthetic gates and the extra class-rooms and dormitories that we all wish to see.

In spite of many difficulties we built the Junior School; we have emerged through a difficult year with our colours flying and we believe that the future in store for us, though it may hold its difficulties and dangers, will also provide us with strength to meet them, courage to endure them, and wisdom to overcome them.

ST. GEORGE'S COLLEGE SERVICE LIST

ALLERTON, C. D. (1935) R.A.C. Officer Cadet
 ALSTON, J. (1922) G.S.C. Lance Corporal
 ANDERSON, D. A. (1938) R.A.C. Trooper
 †ANSON, MAY, H. D. D.S.C. (1929) Sub. Lieut.
 R.N.V.R.
 ARMITAGE, J. (1934) Lieut. R.A.C.
 BACH, T. E. (1934) Flying Officer, R.A.F.V.R.
 †BALL, M. H. (1935) Pilot Officer, R.A.F.V.R.
 (Accidentally killed)
 BECKWITH, I. C. D.F.C. (1928) Flying Officer,
 R.A.F.V.R.
 BEECH, I. B. (1939) Able Seaman, R.N.V.R.
 BELL, J. F., D.F.C. (1934) Squadron Leader.
 R.A.F.V.R.
 BENEDICT, J. D. (1940) 2nd Lieut. R.A.C.
 BENEDICT, J. A. (1940) Trooper, R.A.C.
 BILLET, V. (1930) Warrant Officer. Pilot R.A.F.V.R.
 BIRKS, C. G. N. (1927) Returned Volunteer
 BOARDMAN, J. C. (1919)
 BOTTOMLEY, J. M. (1936) R.A.C.
 BRADBURY, J. C. (1918) Lieut. Royal Engineers
 BRANDON, D. (1934) Sgt. Navigator Bomber
 R.A.F.V.R.
 BRIDGER, S. (1930) R.A.C.
 BRIDGER, D. L. (1936)
 BROWN, H. W. (1925) Captain, Black Watch
 BROWN, N. E. (1929) Captain Royal Warwickshire
 Regt.
 BROWN, M. L. (1937) Private R.A.C.
 BROWNRIGG, M. N. (1919) Pilot Officer, R.A.F.V.R.
 BRUCE, A. D. (1931) Captain Highland Light Infantry
 BRUTON, J. D. (1934) Flying Officer, R.A.F.V.R.
 BRYDON, J. W. (1927) Lieut. R.N.V.R.
